

IS HEALTHBRIDGE GIVING YOUR LOVED ONE ANTIPSYCHOTICS?

ANTIPSYCHOTIC DRUGS ARE ASSOCIATED WITH AN INCREASED RISK OF DEATH WHEN USED IN ELDERLY PATIENTS WITH DEMENTIA.

Highlands Health Care Center has given these drugs to nearly 33% of long-stay residents, which is higher than the state and national averages. HealthBridge's Danbury Health Care Center has also used antipsychotics at a rate that is higher than the state and national averages.

Visit [HealthBridgeWatch.org](https://www.healthbridgewatch.org) to find out more and take action.
